EMPLOYMENT OBJECTIVE

Software Engineer with 2+ years of experience in developing software solutions, automating business processes, and building web and mobile applications. Experienced in JavaScript, React.js, SQL, REST API integration, and Agile software development. Strong background in data analytics and database systems enables the delivery of scalable, data-driven applications that improve operational efficiency and user experience.

EDUCATION

Universitas Komputer Indonesia, Bandung, Indonesia September 2023
Bachelor of Informatics Engineering
GPA : 3.50

CERTIFICATIONS & TRAINING

Web Development March 2023
Badan Nasional Sertifikasi Profesi

Database Programming with SQL, Oracle February 2023
Oracle

CCNav7: Switching, Routing, and Wireless Essentials August 2022
Cisco Network Academy Universitas Komputer Indonesia

Google Cloud: BigQuery for Data Analysis, Coursera July 2022
Coursera

EXPERIENCE

Software Engineer & Data Analyst

PT. Bank Rakyat Indonesia (Persero) Tbk., Asia Afrika, Indonesia March 2024 - March 2026
Developed enterprise automation systems and reporting platforms that improved operational efficiency, reduced manual processing, and supported business-critical decision making.

- Designed and developed web-based automation tools using React and SQL, reducing manual reporting workload and improving operational efficiency by 30%.
- Engineered and optimized SQL-based data processing workflows for large-scale financial systems, improving data reliability and integration readiness.
- Developed and maintained interactive reporting solutions and analytical dashboards to support data-driven decision-making across business units.
- Performed data validation, cleansing, and analysis to ensure high-quality datasets for business reporting and application support.
- Collaborated with cross-functional teams to translate business requirements into scalable data workflows and automated technical solutions.

Key Projects:

- **Performance Analytics & Quality Guard**
Developed a real-time auditing and performance monitoring platform that improved workflow auditing speed by 35%.
- **Automated Intelligence Pipeline**
Developed an automated business intelligence pipeline that reduced manual data-entry discrepancies by 98%.

IT Mobile Developer

PT. Anggana Kurnia Putra, Bojongsoang, Indonesia March 2023 - September 2023
Developed Android mobile application features using ARCore to deliver real-time navigation and spatial mapping capabilities.

- Implemented user interface components and integrated device sensors to provide responsive and intuitive user interactions.
- Optimized application performance through debugging, code refactoring, and memory management, improving application stability and processing speed.
- Utilized Git and Agile development practices to manage source code and support iterative software releases.

Key Project:

- **AR Fabric Navigation System**
Android ARCore navigation application that reduced warehouse item search time from 25 minutes to under 4 minutes.

ACHIEVEMENTS

Best Employee Award (2024), PT Bank Rakyat Indonesia (Persero) Tbk. December 2024
Recognized for delivering high-impact automation solutions, improving operational efficiency, and consistently contributing to technical initiatives across the team.

ADDITIONAL INFORMATION

Technical Skills

- Software Engineering: JavaScript, React.js, HTML5, CSS3, REST API, Git, GitHub
- Programming Languages: Java, SQL
- Database: Oracle Database, BigQuery
- Data Analytics & Visualization: Power BI, Tableau, Microsoft Excel
- AI & Productivity: OpenAI API, Prompt Engineering, LLM Optimization
- Design & Collaboration: Figma, Canva

Additional Activities

- TOEFL ITP Score : 560 (Certified by Englishvit, 2025)
- Web Developer Intern, Dinas Komunikasi dan Informatika Jawa Barat (2022)
